INDEX TO SUBJECTS

A

Absorption, macromolecular, mechanism of horseradish peroxidase uptake and transport, in adult and neonatal rat small intestine, biochemical and light and EM study, 195

Acid phosphatase activity, localization of in granule fractions from rabbit polymorphonuclear leukocytes, biochemical and cytochemical and EM study, 141

Adenosine triphosphatase activity and flagellar movement, in sea urchin sperm extracted with Triton X-100, biochemical and light and EM study, 75

Air sac, dorsal, of rat, tumor angiogenesis in, rapid induction of endothelial mitoses, radioautographic light and EM study, 408

Albumin, serum uptake of in isolated perfused renal tubules, of rabbit nephron, biochemical and radioautographic EM study, 382

Alga *Acetabularia mediterranea*, chloroplasts, synthesis of protein amino acids in, biochemical study, 279

— *Chlamydomonas* 21-gr (wild type) and pf-18 (paralyzed mutant), flagella, distribution of tubulins 1 and 2 in outer doublet microtubules of, biochemical and EM study, 540

— *Chlamydomonas* 21-gr (wild type) and pf-18 (paralyzed mutant), flagella, isolation and electrophoresis of microtubules, matrix, membranes, and mastigonemes, biochemical and EM study, 507

— *Chlamydomonas reinhardi*, chloroplast, in vivo specific labeling of DNA of, biochemical study, 592

— *Griffithsia pacifica*, new pattern of plant cell elongation, bipolar band growth, light and EM study, 184

— *Klebsormidium flaccidum*, filamentous, single peroxisome in cells of, cytochemical study, 431

— *Porphyridium aerugineum*, capsule, incorporation of sulfate into polysaccharide of, biochemical and EM study, 399

— *Porphyridium cruentum*, phycobilisomes of, biochemical and EM study, 313

Amino acids, of protein, synthesis of in isolated chloroplasts from *Acetabularia*, biochemical study, 279

B

Basal body, of rhesus monkey oviduct, three-dimensional structure of, EM study, 246

Behavior, of human diploid and malignant cells, preparation of collagen substrata for study of, biochemical and light and EM study, 626

Bromodeoxyuridine, contact-mediated reversible suppression of myogenesis by, in chondrocytes and myogenic cells of chick embryo, biochemical and cytological study, 166

Brush-border microvilli and plasma membranes from basal infoldings, polarity of, in proximal tubule cell in rat kidney, biochemical and EM study, 232

Brush borders, of rabbit kidney, preparation of, biochemical and EM study, 426

C

Calcium exchange, in rat heart cell culture, effect of lanthanum on, correlated with localization, biochemical and EM study, 441

Calcium repositories, subcellular localization of in plasmodia of acellular slime mold *Physarum polycephalum*, light and EM study, 179

Capsule, of red alga *Porphyridium*, incorporation of sulfate into polysaccharide of, biochemical and EM study, 399

Cell culture, from chick embryo blastoderm, erythropoiesis in, biochemical and cytological study, 98

— elongation, new pattern of bipolar band growth, in red alga, light and EM study, 184

— fusion, in cellular slime mold *Dictyostelium discoideum*, EM study, 665

—, proximal tubule, polarity of, in rat kidney, different surface charges for brush-border microvilli and plasma membranes from basal infoldings, biochemical and EM study, 232

Cells, Chinese hamster CHO line, comparison of synchrony-induction techniques, traverse perturbation index, cytological study, 638

— Chinese hamster DON line, in metaphase, induction of prophase in interphase nuclei by fusion with, radioautographic light and EM study, 120

—, chondrocytes and myogenic, from chick embryo, contact-mediated reversible suppression of myogenesis by bromodeoxyuridine, biochemical and cytological study, 166

—, endothelial, of rat lung, uptake of 5-hydroxytryptamine by, radioautographic light and EM study, 456

—, HeLa, tRNA metabolism in at reduced temperature, biochemical study, 1

—, HTC hepatoma, clonal differences in glutamine synthetase activity of, effects of glutamine and dexamethasone, biochemical study, 175

—, L-929 mouse fibroblasts, effects of cytochalasin B on cytokinesis in, time-lapse cinematographic study, 657

Cells, mucosal epithelial, of rat small intestine, polar distribution of intramitochondrial granules in, EM study, 190
—, of rat heart, correlation of localization of lanthanum with effects on calcium exchange, biochemical and EM study, 441
—, sinusoidal, of rat liver, erythrocyte catabolism in, biochemical and radioautographic and histochemical study, 107
—, SVTR and human lung fibroblasts, collagen substrata for studies on behavior of, biochemical and light and EM study, 626
Centriole formation in male meiosis, in hyrax and Berdmore squirrel, EM study, 20
Chick embryo blastoderm, erythropoiesis by in cell culture, biochemical and cytological study, 98
Chicken blood, and *Drosophila melanogaster* salivary glands, interaction of polylysine with chromatin of, inhibition of *in situ* priming for *Escherichia coli* DNA polymerase, biochemical and radioautographic study, 556
Chloramphenicol and erythromycin, effects of on ultrastructure of mitochondria in sensitive and resistant strains of *Paramecium aurelia*, EM study, 8
Chloroplasts, of *Acetabularia mediterranea*, synthesis of protein amino acids in, biochemical study, 279
—, of *Chlamydomonas reinhardi*, in vivo specific labeling of DNA of, biochemical study, 592
Chromatin, of *Drosophila melanogaster* salivary glands and chicken blood, interaction of polylysine with, inhibition of *in situ* priming for *Escherichia coli* DNA polymerase, biochemical and radioautographic study, 556
Chromosomes, of newt spleen, liver, and testes, localization of repetitive DNA in, biochemical and cytological study, 580
Cilia, of lateral gill of *Mytilus edulis*, metachronal wave of, light and EM study, 493
Clam *Spisula solidissima*, eggs, changes in organization of tubulin during meiosis in, biochemical and EM study, 266
Clonal differences in glutamine synthetase activity of HTC hepatoma cells, effects of glutamine and dexamethasone, biochemical study, 175
Colchicine-binding protein and in vitro secretion of hormone, by mouse thyroid, biochemical study, 157
Collagen, of rat tail tendons, substrata for studies on cell behavior, biochemical and light and EM study, 626
Cytochalasin B, effects of on cytokinesis in L-929 mouse fibroblasts, time-lapse cinematographic study, 657
Cytokinesis, in L-929 mouse fibroblasts, effects of cytochalasin B on, time-lapse cinematographic study, 657
Cytoplasm, of porcine hepatocyte, lacunae in, EM study, 434

D

Dexamethasone and glutamine, effects on clonal differences in glutamine synthetase activity of HTC hepatoma cells, biochemical study, 175
DNA, of *Chlamydomonas reinhardi* chloroplasts, in vivo specific labeling of, biochemical study, 592
—, of mitochondria from thoracic muscles of insect *Schistocerca gregaria*, biochemical and EM study, 295
— polymerase, of *Escherichia coli*, inhibition of *in situ* priming for, interaction of polylysine with chromatin, of *Drosophila melanogaster* salivary glands and chicken blood, biochemical and radioautographic study, 556
—, of protozoan *Crithidia* kinetoplast, form and structure of, biochemical and light and EM study, 346
—, repetitive, chromosomal localization of, in newt liver, spleen, and testes, biochemical and cytological study, 580
Dynein, soluble and bound, from sea urchin sperm flagella, properties of, biochemical and light and EM study, 365

E

Earthworms of family Lumbricidae, body wall muscle, ultrastructurally distinct types of myoneural junctions in, EM study, 566
Eggs, of surf clam *Spisula solidissima*, changes in organization of tubulin during meiosis in, biochemical and EM study, 266
Embryo, chick, blastoderm, erythropoiesis by in cell culture, biochemical and cytological study, 98
Enzyme, glutamine synthetase, clonal differences in activity of, in HTC hepatoma cells, effects of glutamine and dexamethasone, biochemical study, 175
Enzymes, phosphorylase, phosphorylase kinase, and primer complexes, binding of to sarcovesicles of rabbit skeletal muscle, role of sarcoplasmic reticulum in glycogen metabolism, biochemical and EM study, 206
Erythrocyte catabolism, in sinusoidal cells of rat liver, biochemical and radioautographic and histochemical study, 107
Erythromycin and chloramphenicol, effects of on ultrastructure of mitochondria in sensitive and resistant strains of *Paramecium aurelia*, EM study, 8
Erythropoiesis by chick embryo blastoderm in cell culture, biochemical and cytological study, 98

F

Filamentous green alga, single peroxisome in, cytochemical study, 431
Flagella, of *Chlamydomonas*, distribution of tubulins 1 and 2 in outer doublet microtubules of, biochemical and EM study, 540
—, of *Chlamydomonas*, isolation and electrophoresis of microtubules, matrix, membranes, and mastigonemes of, biochemical and EM study, 507
—, of sea urchin sperm extracted with Triton X-100, movement of and adenosine triphosphatase activity, biochemical and light and EM study, 75
—, of sea urchin sperm, properties of bound and soluble dynein from, biochemical and light and EM study, 365

Frog *Rana pipiens*, oocyte, permeability of nucleus of, biochemical and radioautographic study, 609
—, *Rana pipiens*, skeletal muscle, depletion of vesicles from neuromuscular junction of by prolonged tetanic stimulation, physiological and EM study, 30
Fungus *Neurospora crassa*, mitochondria, intracellular site of synthesis of ribosomal proteins of, biochemical study, 56
Fusion, in cellular slime mold *Dictyostelium discoideum*, EM study, 665

G

Gall bladder and intestine, of rabbit, movement of lanthanum across, permeable junctional complexes in, physiological and EM study, 302
Gamma-aminobutyric acid, biosynthesis and content of in goldfish retina, effect of light stimulation, biochemical study, 225
Genes, ribosomal RNA, in salivary gland and ovary of *Rhynchosciara angelae*, biochemical study, 421
Gill, of *Mytilus edulis*, metachronal wave of lateral cilia of, light and EM study, 493
Glutamine and dexamethasone, effects on clonal differences in glutamine synthetase activity of HTC hepatoma cells, biochemical study, 175
Glycogen metabolism in rabbit skeletal muscle, role of sarcoplasmic reticulum, binding of phosphorylase, phosphorylase kinase, and primer complexes to sarcovesicles, biochemical and EM study, 206
Goldfish *Carissius auratus*, retina, biosynthesis and content of gamma-aminobutyric acid in, effect of light stimulation, biochemical study, 225
Granules, azurophil and specific, from rabbit polymorphonuclear leukocytes, isolated membranes of, biochemical and EM study, 133
—, azurophil and specific, from rabbit polymorphonuclear leukocytes, localization of acid phosphatase activity in, biochemical and cytochemical and EM study, 141
—, intramitochondrial, polar distribution of in mucosal epithelial cells of rat small intestine, EM study, 190
Growth, bipolar band, new pattern of plant cell elongation, in red alga, light and EM study, 184

H

Heart, liver, and kidney, of rat, mitochondria of in solution, direct counting and sizing of, biochemical study, 325
Hepatocyte, of mouse, isolation of gap junctions of, biochemical and X-ray diffraction and EM study, 646
—, porcine, cytoplasmic lacunae of, EM study, 434
Hormone secretion by mouse thyroid, and colchicine binding protein, biochemical study, 157
5-Hydroxytryptamine, uptake of by rat pulmonary endothelial cells, radioautographic light and EM study, 456
Hyrax *Heterohyrax syriacus* and squirrel *Memetes berdmorei*, testes, centriole formation in male meiosis in, EM study, 20

I

Insect *Drosophila melanogaster* salivary glands, and chicken blood, interaction of polylysine with chromatin of, inhibition of *in situ* priming for *Escherichia coli* polymerase, biochemical and radioautographic study, 556
—, fungus gnat *Rhynchosciara*, spermatozoa, disruption of microtubules of, EM study, 598
—, *Rhynchosciara angelae*, salivary gland and ovary, ribosomal RNA genes in, biochemical study, 421
—, *Schistocerca gregaria*, thoracic muscles, mitochondrial DNA of, biochemical and EM study, 295
Intestine and gall bladder, of rabbit, movement of lanthanum across, permeable junctional complexes in, physiological and EM study, 302
—, small, or neonatal and adult rat, macromolecular absorption in, mechanism of horseradish peroxidase uptake and transport, biochemical and light and EM study, 195
—, small, of rat, polar distribution of intramitochondrial granules of mucosal epithelial cells of, EM study, 190

J

Junctional complexes, permeable, movement of lanthanum across rabbit gall bladder and intestine, physiological and EM study, 302
Junctions, gap, of mouse hepatocyte, isolation of, biochemical and X-ray diffraction and EM study, 646
—, myoneural, ultrastructurally distinct types, in earthworm body wall muscle, EM study, 566
—, neuromuscular, of frog, depletion of vesicles from by prolonged tetanic stimulation, physiological and EM study, 30

K

Kidney, liver, and heart, of rat, mitochondria of in solution, direct counting and sizing of, biochemical study, 325
—, of rabbit, isolated perfused renal tubules, serum albumin uptake in, biochemical and radioautographic EM study, 382
—, of rabbit, preparation of renal brush borders, biochemical and EM study, 426
—, of rat, polarity of proximal tubule cell in, different surface charges for brush-border microvilli and plasma membranes from basal infoldings, biochemical and EM study, 232
Kinetosomes, free, types and spatial arrangement of, in Australian flagellates, light and EM study, 39

L

Lacunae, in cytoplasm of porcine hepatocyte, EM study, 434
Lanthanum, movement of across rabbit gall gladder and intestine, permeable junctional complexes physiological and EM study, 302
—, in rat heart cell cultures, effect on calcium exchange correlated with localization, biochemical and EM study, 441

Leukocytes, polymorphonuclear, of rabbit, isolated membranes of azurophil and specific granules from, biochemical and EM study, 133
—, polymorphonuclear, of rabbit, localization of acid phosphatase activity in granule fractions from, biochemical and cytochemical and EM study, 141
Light stimulation, effect on biosynthesis and content of gamma-aminobutyric acid in goldfish retina, biochemical study, 225
Liver, kidney, and heart, of rat, mitochondria of in solution, direct counting and sizing of, biochemical study, 325
—, of mouse, isolation of hepatocyte gap junctions, biochemical and X-ray diffraction and EM study, 646
—, of newt *Triturus viridescens*, chromosomal localization of repetitive DNA in, biochemical and cytological study, 580
—, of rat, erythrocyte catabolism in sinusoidal cells of, biochemical and radioautographic and histochemical study, 107
Lung, of rat, uptake of 5-hydroxytryptamine by endothelial cells of, radioautographic light and EM study, 456

M

Mastigonemes, microtubules, matrix, and membranes, of *Chlamydomonas* flagella, biochemical and EM study, 507
Matrix, microtubules, membranes, and mastigonemes of *Chlamydomonas* flagella, biochemical and EM study, 507
Meiosis, in eggs of surf clam *Spisula solidissima*, changes in organization of tubulin during, biochemical and EM study, 266
—, male, centriole formation in, in hyrax and Berdmore squirrel, EM study, 20
Membranes, of azurophil and specific granules from rabbit polymorphonuclear leukocytes, biochemical and EM study, 133
—, microtubules, matrix, and mastigonemes of *Chlamydomonas* flagella, biochemical and EM study, 507
—, plasma, from basal infoldings, and brush-border microvilli, polarity of, in proximal tubule cell of rat kidney, biochemical and EM study, 232
Microtubules, matrix, membranes, and mastigonemes of *Chlamydomonas* flagella, biochemical and EM study, 507
— outer doublet, of *Chlamydomonas* flagella, distribution of tubulins 1 and 2 in, biochemical and EM study, 540
—, of spermatozoa of fungus gnat *Rhynchosciara*, disruption of, EM study, 598
Mitochondria, of *Candida utilis*, characterization of ribosomes of, biochemical and physical and EM study, 468
—, of mucosal epithelial cells of rat small intestine, polar distribution of granules in, EM study, 190
—, of *Neurospora crassa*, intracellular site of synthesis of ribosomal proteins of, biochemical study, 56
—, of rat liver, kidney, and heart, in solution, direct counting and sizing of, biochemical study, 325
Mitochondria, of sensitive and resistant strains of *Paramecium aurelia*, effects of erythromycin and chloramphenicol on ultrastructure of, EM study, 8
—, from thoracic muscles of insect *Schistocerca gregaria*, biochemical and EM study, 295
Mitosis, endothelial, rapid induction of, in rat dorsal air sac, tumor angiogenesis, radioautographic light and EM study, 408
Monkey, rhesus, *Macaca mulatta*, oviduct, three-dimensional structure of basal body from, EM study, 246
Mouse, liver, isolation of hepatocyte gap junctions, biochemical and X-ray diffraction and EM study, 646
—, thyroid, colchicine-binding protein and in vitro secretion of hormone by, biochemical study, 157
Muscle, of earthworm body wall, ultrastructurally distinct types of myoneural junctions in, EM study, 566
—, skeletal, of rabbit, role of sarcoplasmic reticulum in glycogen metabolism, binding of phosphorylase, phosphorylase kinase, and primer complexes to sarcovesicles, biochemical and EM study, 206
—, thoracic, of insect *Schistocerca gregaria*, mitochondrial DNA of, biochemical and EM study, 295
Mussel *Mytilus edulis*, gill, metachronal wave of lateral cilia of, light and EM study, 493
Myogenesis, contact-mediated reversible suppression of by bromodeoxyuridine, in chondrocytes and myogenic cells of chick embryo, biochemical and cytological study, 166
Myoneural junctions, ultrastructurally distinct types, in earthworm body wall muscle, EM study, 566

N

Nephron, of rabbit, isolated perfused renal tubules, serum albumin uptake in, biochemical and radioautographic EM study, 382
Newt *Triturus viridescens*, liver, spleen, and testes, chromosomal localization of repetitive DNA in, biochemical and cytological study, 580
Nuclei, interphase, of Chinese hamster DON line, induction of prophase in by fusion with metaphase cells, radioautographic light and EM study, 120
Nucleus, of amphibian oocyte, permeability of, biochemical and radioautographic study, 609

O

Oocytes, of frog, permeability of nucleus of, biochemical and radioautographic study, 609
Ovary and salivary gland, of *Rhynchosciara angelae*, ribosomal RNA genes in, biochemical study, 421
Oviduct, of rhesus monkey, three-dimensional structure of basal body from, EM study, 246

P

Peroxidase, horseradish, mechanism of uptake and transport in adult and neonatal rat small intestine, biochemical and light and EM study, 195
Peroxisome, single, in filamentous green alga, cytochemical study, 431

Perturbation index, comparison of synchrony-induction techniques on mammalian cell-cycle traverse, cytological study, 638
Phycobilisomes, isolation of from *Porphyridium cruentum*, biochemical and EM study, 313
Pig *Sus domestica*, liver, cytoplasmic lacunae of hepatocyte of, EM study, 434
Plasmodia, of acellular slime mold *Physarum polycephalum*, subcellular localization of calcium repositories in, light and EM study, 179
Polylysine, interaction of with chromatin, inhibition of *in situ* priming for *Escherichia coli* DNA polymerase, biochemical and radioautographic study, 556
Polysaccharide, of capsule of red alga *Porphyridium*, incorporation of sulfate into, biochemical and EM study, 399
Prophase, induction of in interphase nuclei by fusion with metaphase cells of Chinese hamster DON line, radioautographic light and EM study, 120
Protein amino acids, synthesis of in isolated chloroplasts from *Acetabularia*, biochemical study, 279
—, colchicine-binding, and in vitro secretion of hormone, by mouse thyroid, biochemical study, 157
—, dynein, soluble and bound, from sea urchin sperm flagella, properties of, biochemical and light and EM study, 365
Proteins, ribosomal, intracellular site of synthesis of, in mitochondria of *Neurospora crassa*, biochemical study, 56
Protozoa, Australian flagellates *Deltotrichonympha operculata* and *Koruga bonita*, types and spatial arrangement of free kinetosomes in, light and EM study, 39
Protozoan *Crithidia*, form and structure of kinetoplast DNA of, biochemical and light and EM study, 346
— *Paramecium aurelia*, sensitive and resistant strains, effects of erythromycin and chloramphenicol on ultrastructure of mitochondria in, EM study, 8

R

Rabbit, gall bladder and intestine, movement of lanthanum across, permeable junctional complexes in, physiological and EM study, 302
—, kidney, isolated perfused renal tubules, serum albumin uptake in, biochemical and radioautographic EM study, 382
—, kidney, preparation of renal brush borders, biochemical and EM study, 426
—, polymorphonuclear leukocytes, isolated membranes of azurophil and specific granules from, biochemical and EM study, 133
—, polymorphonuclear leukocytes, localization of acid phosphatase activity in granule fractions from, biochemical and cytochemical and EM study, 141
—, skeletal muscle, role of sarcoplasmic reticulum in glycogen metabolism, binding of phosphorylase, phosphorylase kinase, and primer complexes to sarcovesicles, biochemical and EM study, 206
Radioactive label, adenine-^{3}H and thymidine-^{3}H, in vivo specific labeling of *Chlamydomonas* chloroplast DNA, biochemical study, 592
Radioactive label, albumin-^{125}I, serum albumin uptake in isolated perfused renal tubules, of rabbit nephron, biochemical and radioautographic EM study, 382
— label, amino acids-^{14}C and leucine-^{3}H, intracellular site of synthesis of mitochondrial ribosomal proteins in *Neurospora crassa*, biochemical study, 56
— label, arginine-^{3}H, leucine-^{3}H, lysine-^{3}H, thymidine-^{3}H, and uridine-^{3}H, inductions of prophase in interphase nuclei by fusion with metaphase cells, of Chinese hamster DON line, radioautographic light and EM study, 120
— label, calcium-^{45}Ca, effect of lanthanum on calcium exchange correlated with localization, in rat heart cell culture, biochemical and EM study, 441
— label, colchicine-^{3}H, changes in organization of tubulin during meiosis in eggs of surf clam *Spisula solidissima*, biochemical and EM study, 266
— label, colchicine-^{3}H and ^{131}I, colchicine-binding protein and secretion of hormone by mouse thyroid, biochemical study, 157
— label, glutamate-^{14}C, effect of light stimulation on biosynthesis and content of gamma-aminobutyric acid in goldfish retina, biochemical study, 225
— label, ^{198}gold, albumin-^{131}I, technetium sulfur ^{99}Tc-S, and ^{59}Fe, erythrocyte catabolism in sinusoidal cells of rat liver, biochemical and radioautographic and histochemical study, 107
— label, histidine-^{14}C, macromolecular absorption, mechanism of horseradish peroxidase uptake and transport, in adult and neonatal rat small intestine, biochemical and light and EM study, 195
— label, 5-hydroxytryptamine creatinine sulfate-^{3}H, uptake of 5-hydroxytryptamine by rat pulmonary endothelial cells, radioautographic light and EM study, 456
— label, lanthanum chloride- ^{140}La, permeable junctional complexes, movement of lanthanum across rabbit gall bladder and intestine, physiological and EM study, 302
— label, leucine-^{14}C, uracil-^{14}C, and inorganic phosphate- ^{32}P, characterization of mitoribosomes from *Candida utilis*, biochemical and physical and EM study, 468
— label, methionine-^{3}H, uridine-^{3}H, S-adenosylmethyl-methionine-^{3}H, and phosphoric acid- ^{32}P, RNA metabolism in HeLa cells at reduced temperature, biochemical study, 1
— label, orotic acid-^{3}H and uridine-^{3}H, ribosomal RNA genes in salivary gland and ovary of *Rhynchosciara angelae*, biochemical study, 421
— label, RNA-^{3}H, chromosomal localization of repetitive DNA in newt *Triturus viridescens*, biochemical and cytological study, 580
— label, sodium carbonate-^{14}C, synthesis of protein amino acids in isolated chloroplasts from *Acetabularia*, biochemical study, 279
— label, sodium sulfate-^{35}S, incorporation of sulfate into capsular polysaccharide of red alga *Porphyridium*, biochemical and EM study, 399
— label, sodium sulfate-^{35}S and thymidine-^{3}H, contact-mediated reversible suppression of myogenesis by bromodeoxyuridine, in chondrocytes and myo-

genic cells of chick embryo, biochemical and cytological study, 166
Radioactive label, sucrose-^{3}H, permeability of amphibian oocyte nucleus, biochemical and radioautographic study, 609
— label, thymidine-^{3}H, collagen substrata for studies on cell behavior, biochemical and light and EM study, 626
— label, thymidine-^{3}H, erythropoiesis in cell cultures from chick embryo blastoderm, biochemical and cytological study, 98
— label, thymidine-^{3}H, and formaldehyde-^{14}C, interaction of polylysine with chromatin, inhibition of *in situ* priming for *Escherichia coli* DNA polymerase, biochemical and radioautographic study, 556
— label, thymidine-^{3}H, tumor angiogenesis in rat dorsal air sac, rapid induction of endothelial mitoses, radioautographic light and EM study, 408
Rat, dorsal air sac, tumor angiogenesis in, rapid induction of endothelial mitoses, radioautographic light and EM study, 408
—, kidney, polarity of proximal tubule cell in, different surface charges for brush-border microvilli and plasma membranes from basal infoldings, biochemical and EM study, 232
—, liver, erythrocyte catabolism in sinusoidal cells of, biochemical and radioautographic and histochemical study, 107
—, liver, kidney, and heart, mitochondria of in solution, direct counting and sizing of, biochemical study, 325
—, lung, uptake of 5-hydroxytryptamine by endothelial cells of, radioautographic light and EM study, 456
—, small intestine, adult and neonatal, macromolecular absorption in, mechanism of horseradish peroxidase uptake and transport, biochemical and light and EM study, 195
—, small intestine, polar distribution of intramitochondrial granules of mucosal epithelial cells of, EM study, 190
Retina, of goldfish, biosynthesis and content of gamma-aminobutyric acid in, effect of light stimulation, biochemical study, 225
Ribosomes, of *Candida utilis* mitochondria, characterization of, biochemical and physical and EM study, 468
—, of *Neurospora crassa*, mitochondria, intracellular site of synthesis of proteins of, biochemical study, 56
RNA metabolism in HeLa cells at reduced temperature, processing of tRNA, biochemical study, 1
—, ribosomal genes, in salivary gland and ovary, of *Rhynchosciara angelae*, biochemical study, 421

S

Salivary gland and ovary, of *Rhynchosciara angelae*, ribosomal RNA genes in, biochemical study, 421
Sarcoplasmic reticulum, role of in glycogen metabolism, binding of enzymes to sarcovesicles of rabbit skeletal muscle, biochemical and EM study, 206
Sea urchin *Colobocentrotus atratus*, sperm extracted with Triton X-100, flagellar movement and adenosine triphosphatase activity in, biochemical and light and EM study, 75
— *Colobocentrotus atratus*, sperm, properties of bound and soluble dynein from flagella of, biochemical and light and EM study, 365
Slime mold *Dictyostelium discoideum*, cell fusion in, EM study, 665
— mold *Physarum polycephalum*, acellular, subcellular localization of calcium repositories in plasmodia of, light and EM study, 179
Sperm, of sea urchin *Colobocentrotus atratus*, extracted with Triton X-100, flagellar movement and adenosine triphosphatase activity in, biochemical and light and EM study, 75
—, of sea urchin *Colobocentrotus atratus*, properties of bound and soluble dynein from flagella of, biochemical and light and EM study, 365
Spermatozoa, of fungus gnat *Rhynchosciara*, disruption of microtubules of, EM study, 598
Spermiogenesis, in hyrax and Berdmore squirrel, centriole formation in male meiosis in, EM study, 20
Spleen, of newt *Triturus viridescens*, chromosomal localization of repetitive DNA in, biochemical and cytological study, 580
Squirrel *Memetus berdmorei* and hyrax *Heterohyrax syriacus*, testes, centriole formation in male meiosis in, EM study, 20
Sulfate, incorporation of into capsular polysaccharide of red alga *Porphyridium*, biochemical and EM study 399
Synchrony-induction techniques, comparison of, traverse perturbation index, in Chinese hamster cells (CHO line), cytological study, 638

T

Temperature, reduced, and RNA metabolism in HeLa cells, biochemical study, 1
Testes, of hyrax and Berdmore squirrel, centriole formation in male meiosis in, EM study, 20
—, of newt *Triturus viridescens*, chromosomal localization of repetitive DNA in, biochemical and cytological study, 580
Tetanic stimulation, prolonged, depletion of vesicles from frog neuromuscular junctions by, physiological and EM study, 30
Thyroid, of mouse, colchicine-binding protein and in vitro secretion of hormone by, biochemical study, 157
Traverse perturbation index, comparison of synchrony-induction techniques, in Chinese hamster cells (CHO line), cytological study, 638
Triton X-100, flagellar movement and adenosine triphosphatase activity in sea urchin sperm extracted with, biochemical and light and EM study, 75
Tubulin, changes in organization of, during meiosis in eggs of surf clam *Spisula solidissima*, biochemical and EM study, 266
Tubulins, 1 and 2, distribution of in outer doublet microtubules of *Chlamydomonas* flagella, biochemical and EM study, 540
Tumor angiogenesis, in rat dorsal air sac, rapid induction of endothelial mitoses, radioautographic light and EM study, 408

V

Vesicles, depletion of from frog neuromuscular junctions by prolonged tetanic stimulation, physiological and EM study, 30

—, of sarcoplasmic reticulum, of rabbit skeletal muscle, binding of phosphorylase, phosphorylase kinase, and primer complexes to, biochemical and EM study, 206

W

Wave, metachronal, of lateral cilia of *Mytilus edulis*, light and EM study, 493

Y

Yeast *Candida utilis*, mitochondria, characterization of ribosomes of, biochemical and physical and EM study, 468
